

RAPID IMMERSION-TYPE THERMOCOUPLE

快速测温热电偶

应用领域 (Application) :

快速测温热电偶用于测量钢水及高温熔融金属液的温度。

It is used to measure the temperature of molten steel and high temperature of molten metal.

产品特点 (Features) :

- 测量温度准确，误差小于 $\pm 1.5^{\circ}\text{C}$
- 响应速度快，测量时间短，操作安全
- 选用材料好，使用次数多，降低成本
- 插接方式：H型、O型、S型、Z型
- 保护管型式：直卷纸管、斜卷纸管、耐火纤维纸管、耐火纤维套管
- 保护帽型式：铝帽、铁帽、塑料帽、纸管帽
- 保护管长度：150mm、300mm、500mm、700mm、1000mm、1200mm、1500mm
- Measure temperature accurately .Error is less than $\pm 1.5^{\circ}\text{C}$
- Fast response, Short measure time,Operational safety
- Use good materials,More using times,Reduce costs
- Socket way: H type,O type,S type,Z type
- Types of protect tube: Straight poll paper tube,oblique poll paper tube,Flame-resistant fiber tube, Flame-resistant fiber casing pipe
- Types of protect cap:Aluminum cap,Iron cap,Resin cap,Paper cap
- Length of Protect tube:150mm,300mm,500mm,700mm,1000mm,1200mm,1500mm
