

## FIN PAPER RUNNER

### 纸质浇道

铸造用纸质浇道管主要适用于消失模铸造、实型铸造、传统砂型铸造、覆膜砂铸造等铸造方法，对提高铸件质量、减少废品率、改善再生砂纸量、减少作业强度等方面起到积极作用。

The fin paper runners are mainly suitable for casting methods such as vanishing mold casting, solid casting, traditional mould casting, and film sand casting, which play a positive role in improving the quality of castings, reducing scrap rate, improving the amount of recycled sandpaper and reducing the operating strength.

#### 产品特点 (Features) :

- 重量轻、操作方便;
  - 密封性好, 有效减少铸件夹砂缺陷;
  - 强度高, 不易损坏;
  - 隔热, 保温效果好;
  - 环保低碳;
- Light weight and easy to operate
  - Good sealing, effectively reduce the casting sand defects
  - High strength, not easy to damage
  - Good insulation effect
  - Environmentally friendly low-carbon

#### 注意事项 (Precautions) :

- 请在砂中充实填埋;
  - 浇注铁水时, 根据浇注基本规范, 铁水需将浇注口填满, 防止空气进入。
- Make sure the jointed paper runners are very compact with sand in the mould
  - please follow the basic specification when pouring, make sure the molten iron full fill the pouring gate and no air can enter.
